

Unit 04

Exploring Renewable Energy

: 5 Types for a Sustainable Future

A. Warming Up

- What are the problems of fossil energy? *20원씩, 20원씩, 20원씩, 20원씩*
- What are the 5 alternative sources of energy? *태양광, 풍력, 수력, 지열, 조력*
- Which form of alternative energy would be the most suitable for your area? *태양광*

B. Key Expressions

- Wind energy is a renewable source that doesn't contribute to air pollution.
- The construction of large dams can result in the loss of habitats.
- Geothermal energy taps into the Earth's heat trapped beneath the crust.

41

- Which of the following is the major advantages of geothermal energy?
 - (A) It's not as common as other types of renewable energy sources.
 - (B) Sometimes large amounts of this heat escapes naturally.
 - (C) High cost to build the infrastructure and its vulnerability to earthquakes
 - (D) It's naturally replenished and does not run a risk of depleting.
- According to the passage, which of the following is NOT true about ocean energy?
 - (A) It is created by the earth's rotation and gravity from the moon.
 - (B) It is produced by the difference in temperature and wind.
 - (C) Unlike other forms of renewable energy, wave energy is predictable.
 - (D) Those who live in landlocked states won't have ready access to this energy.

E. Grammar Checkup

Choose one that can best complete the following sentences.

- Renewable energy plays a vital role in _____ environmental concerns and meeting the world's growing energy needs.
 - (A) address
 - (B) addressed
 - (C) addressing
 - (D) to address
- Wind power has become increasingly cost-effective, making it _____ communities and businesses.
 - (A) accessibility
 - (B) accessible
 - (C) accessibly
 - (D) access

48

Assignment 04

학부	학과	학번
이름	장수	제출일

D. Comprehension Checkup

Choose the best answer to the following questions.

- Which of the following is NOT the advantages of solar energy in the passage?
 - (A) limitless energy source
 - (B) improving public health
 - (C) reusing fossil fuels
 - (D) reducing energy costs
- Which of the following is the largest obstacle to using solar energy?
 - (A) materials to make panels
 - (B) technical problems
 - (C) nights without sunlight
 - (D) expenses and space
- Based on the article, which of the following is NOT related to wind energy?
 - (A) using turbines
 - (B) clean energy source
 - (C) wind farms
 - (D) offering consistency
- In the passage, which of the following is NOT the benefits of hydroelectric power?
 - (A) The storage systems may use fossil fuel to pump water.
 - (B) Hydroelectric power is very versatile.
 - (C) Hydroelectric power hardly generates air pollution.
 - (D) It is cost-effective and economically viable.

47

Unit 04 | Exploring Renewable Energy

- Different systems, including wind farms and single-wind turbines, are used _____ wind energy.
 - (A) generate
 - (B) to generate
 - (C) generating
 - (D) generation
- Ocean energy production is reliant _____ warm water temperatures and tidal movements.
 - (A) at
 - (B) on
 - (C) in
 - (D) with
- Hydroelectric power utilizes the flow of water to generate electricity, _____ through dam-based systems or run-of-river methods.
 - (A) both
 - (B) not only
 - (C) neither
 - (D) either
- The accessibility of geothermal resources is limited to specific geological locations, _____ restricts its widespread adoption.
 - (A) that
 - (B) what
 - (C) which
 - (D) who

F. Vocabulary Checkup

Choose the synonym of the following underlined parts.

- Solar energy is derived by capturing radiant energy from sunlight and _____ it into heat, electricity, or hot water.

49

- (A) increasing (B) dividing
(C) improving (D) converting
2. Sunlight is an abundant and endless resource, making solar power a sustainable _____ to fossil fuels.
(A) atmosphere (B) alternative
(C) production (D) barrier
3. Wind energy is a clean and renewable source that doesn't contribute to air _____.
(A) cost (B) conflict
(C) pollution (D) waste
4. Hydroelectric power is _____, ranging from large-scale projects like dams to smaller underwater turbines.
(A) versatile (B) reliable
(C) sustainable (D) renewable
5. Supportive policies are essential for the widespread _____ of renewable energy sources.
(A) responsibility (B) range
(C) obstacle (D) adoption
6. Geothermal energy taps into the Earth's heat trapped beneath the _____.
(A) middle layer (B) atmosphere
(C) gas layer (D) crust
